Abstract (en)
[origin: WO2011015660A1] The invention relates to a formwork panel for concrete work, having a front side providing a formwork side, having the following features: (a) the formwork panel is made of formwork panel elements detachably connected to each other; (b) the formwork panel elements include a first edge beam (4) and a second edge beam (4) extending along two opposite edges of the formwork panel; (c) the formwork panel elements include filler elements (6) each extending from the first edge beams to the second edge beams; and (d) the filler elements are both part of the supporting structure of the formwork panel and the front side of each is part of the formwork surface of the formwork panel.
