Abstract (en)

[origin: WO2011015367A1] The invention relates to a gas-insulated high-voltage switching system, comprising: a housing having a switch module including an actuator; a control module; a cable outlet; a transformer and a circuit breaker (16, 40, 54); and a grounding switch (24, 42, 58), wherein the circuit breaker (16, 40, 54) and the grounding switch (24, 42, 58) are spatially and structurally separated from one another and may be operated by a common actuator.
