Abstract (en)

[origin: WO2011015579A1] The invention relates to granulated material consisting of a-olefin-vinyl acetate copolymers having a vinyl acetate content of > 40% by weight, relative to the total weight of the a-olefin-vinyl acetate copolymers, as an embedding material for solar modules, the granulated material comprising at least one UV activator and at least one silane coupling reagent as additives, and the use thereof for producing films for solar modules.
