Abstract (en)
[origin: WO2011015558A1] The invention relates to a protection device (10) for an inspection installation (11) which is used to test objects (1) which have a tendency to burn and emit gas, in particular lithium-ion batteries. Said inspection installation (11) comprises a test chamber (12) which can be closed by a door-like opening element (14) with a sealing element arranged therebetween and a test device (13) arranged in the test chamber (12) for the objects (1). According to the invention, the test chamber (12) comprises a gas evacuation device (15) and is surrounded by a closed housing (20).
