Abstract (en)
A bed (1) with a height-adjustable bunk (2), the bed (1) having a number of posts (7), each defined by a guide (8) fixable in a vertical position, and by a slide (12) integral with the bunk (2) and fitted to the guide (8) to slide a given length along the guide (8), under the control of an actuating device (32), to move the bunk (2) between a bottom level and a top level; the guide (8) extending to a level at most equal to the bottom level; and the slide (12) having a top portion connecting it to the bunk (2), and which projects from the top of the guide (8) when the bunk (2) is at the top level.
