Abstract (en)
A child carrier (1) is provided comprising a main body (3) and left and right shoulder straps (11A, 11B) connected with left and right sides (9A, 9B) of the main body, respectively. The child carrier is characterised by a left cross strap (27A) connected with the left side of the main body and/or the left shoulder strap, and a right cross strap (27B) connected with the right side of the main body and/or the right shoulder strap, wherein the left side of the main body and/or the left shoulder strap comprise at least one left fastener (29A, 31A) and the right side of the main body and/or the right shoulder strap comprise at least one right fastener (29B, 31B), respectively, for fastening the right and left cross straps (27B, 27A) to a left and a right fastener (29A, 31A; 29B, 31B), respectively.
