Abstract (en)
[origin: EP2462999A1] The range (1) has a playing surface part (1a) provided with a front zone (1b) in communication with a collection zone (9), where a rear area (1c) covered with a pushing device (2) is arranged for back and forth movement of the rear zone toward the front zone and vice versa. The range is arranged to receive coins or tokens (10) introduced by a player. An opening (5) is arranged to be in communication with interior collection zone and a portion of the coins or tokens passing via the opening and collected in the zone. A recess (4) is connected to the opening and placed beneath the surface part. Independent claims are also included for the following: (1) an amusement machine i.e. cascade or pusher machine, comprising an introduction device of coins or tokens (2) a method for manufacturing a playing range.
