Abstract (en)  
[origin: EP2463040A1] The straightener (1) has multiple straightening devices e.g. inlet part (3), outlet part (4) and straightening part (5), provided with straightening nozzles (6) on a base part (2) for passing a wire to be straightened. The straightening nozzles are arranged centrally from the inlet part and the outlet part while the straightening nozzles of the straightening part are eccentrically located in a rotational body (7) that is rotatable around a central axis. A modular structure of the straightener is provided with individual assembly modules (8).
