Abstract (en)
The pallet (2) has a frame comprising a post (4a) deployed between a storage position on a base (3) and a utilization position in which the post is erected on the base. A flexible winding element (10) is assembled with the post in an integral manner, and extended perpendicular to the base in the utilization position to retain goods stored on the pallet. The base has housing (6) to receive the post in the storage position and an orifice to receive the post in the utilization position. The base is made of thermoformed plastic material, and the post is made of metal or composite material. The flexible winding element is chosen from a plastic material or textile fiber net, a fabric and a film. An independent claim is also included for a method for palletization of the pallet.

Abstract (fr)
Palette de stockage comprenant un socle (3) et une armature apte à être déployée sur le socle (3), ladite armature comprenant au moins un montant (4a) agencé pour être déployé entre une position de rangement sur le socle et une position d'utilisation dans laquelle ledit montant (4a) est dressé sur le socle (3) de la palette (2), ladite palette étant caractérisée par le fait qu'elle comprend un élément d'enroulement (10) souple monté solidaire du montant (4a) et agencé pour être étendu sensiblement perpendiculairement au socle (3) en position d'utilisation du montant (4a) de sorte à retenir des marchandises stockées sur la palette (2).
