Abstract (en)

[origin: EP2463441A2] The invention relates to a dust control system comprising a housing arranged to be mounted on a vehicle or a frame movably supported for movement upon a surface to be swept, which housing is arranged to at least partially enclose at least one rotatable sweeping device, and where the at least one rotatable sweeping device is mounted to the said vehicle or frame. The dust control system further comprises at least one chamber for laying dust, in particular airborne dust, wherein said chamber is provided with at least one liquid atomizer means.
