Abstract (en)

The invention relates to a bolt arrangement for a lock body. The bolt arrangement comprises a frame (8), whose ends (25, 26) are open. On the sides of the frame, there are ridges (9) and slots (10) located between them. The bolt (4) of the bolt arrangement has corresponding shapes (9, 10). The bolt can be turned to change the orientation of the lock body. The bolt and the frame prevent manipulation of the lock body.
