Abstract (en)
[origin: EP2463487A1] The present invention relates to an oil plug (1), an oil plug receiver (2) and to an assembly (100) thereof comprising the oil plug (1) and the oil plug receiver (2) whereby a radial sealing may be provided there between. The oil plug (1) comprises a first engagement means (3) adapted for engaging with complementary second engagement means (4) on the oil plug receiver (2) when the oil plug (1) is arranged in said oil plug receiver (2). The second engagement means (4) is arranged on an inner wall (16) of the oil plug receiver (2) and is adapted to hold the oil plug (1) in an axially locked or engaged position by the first engagement means (3) engaging the complementary second engagement means (4). The oil plug receiver (2) comprises a contact surface (17a) for receiving a spring element (13a). The spring element (13a) pushes against the oil plug (1) when the oil plug (1) is arranged in an engaged position in the oil plug receiver (2).
