Abstract (en)

[origin: WO2011050375A1] The invention relates to a pull-in or pull-out device (9) for moving a movable furniture part (3) or for moving a rail (6, 7) of a drawer pull-out guide (4) relative to a furniture body (2), comprising a tappet (10) for applying force to the movable furniture part (3) or to the rail (6, 7) of the drawer pull-out guide (4), to which tappet force is or can be applied by means of a force accumulator (18), the tappet (10) having a pulling lever (15), which can be detachably coupled to the movable furniture part (3) or to the rail (6, 7) of the drawer pull-out guide (4), the pull-in or pull-out device being characterized in that the pulling lever (15) has either at least two coupling points (16a, 16b) or a coupling point (25) that is movable between two positions for detachably coupling the pulling lever (15) to the movable furniture part (3) or to the rail (6, 7) of the drawer pull-out guide (4), either the at least two coupling points (16a, 16b) or the two positions between which the movable coupling point (25) can be moved being arranged at a distance from each other along the length of the pulling lever (15).
