Abstract (en)  
[origin: WO2011018059A1] The functionality and effectiveness of a goods advancing device for a front cardboard box or goods tray of several cardboard boxes or goods trays of a shelf-ready packaging system arranged one behind the other on a shelf of a display rack or storage rack, said cardboard boxes or goods trays having goods or packagings of goods stored therein, said goods advancing device comprising a pushing plate for the goods on a slide housing, are improved further and manual shelf stocking of deep sales racks having tight shelf spacings and several cardboard boxes or goods trays stored one behind the other is made substantially easier, which is achieved in that the pushing plate (4) is fixed to the slide housing (5) so as to be height adjustable and can be moved from an erect functional position to a flattened position.
