Abstract (en)
[origin: WO2011018493A1] The invention relates to a method for producing metal packages having the steps of forming a metal package (10), particularly of steel or aluminum, from a sheet metal material, particularly of thin or very thin or tin sheet, having an interior (12), and coating the interior (12) with a coating agent (30) based on paraffin. The coating agent (30) is preferably heated to a temperature above the solidification temperature after coating (Fig. 5).
