Abstract (en)

[origin: WO2011006660A1] The invention relates to a method for producing molded compounds for producing, treating, coating, finishing and refining a body, comprising the following steps: Mixing a binder, consisting of a mixture of milk protein and lime or a lime substitute, selected from the group consisting of NaOH, KOH solution, sodium hydrogen carbonate, ammonium hydrogen carbonate, potash and/or wood ash with at least one filler, selected from the group consisting of closed-cell carriers, open-cell or porous products, blowing agents or granulates, and/or fiber materials and fiber composites or expanded plastics into a molded compound.
