Abstract (en)

[origin: WO2011018591A2] Said pre-manufactured element (1) for building construction comprises a structural portion (25) having a first surface to be placed outside said building and a second surface to be placed inside said building. Said element incorporates, on at least part of the second surface thereof, at least one layer (27) of at least one insulating material enabling the removal of thermal bridges between the outside and inside of a building incorporating said element, said element moreover incorporating a plurality of corner brackets (29) for holding elements (39) that form a floor framework.
