Abstract (en)
[origin: WO2011018615A2] An edge protection system for a base is described comprising a fixing means securable to or integral with the base and a barrier configured for releasable engagement with the fixing means to retain the barrier on the base, when the base is raised to a working position. There is also provided a guard rail, a barrier and an adjustment device for an edge protection system and a method of assembling an edge protection system.
