Abstract (en)

[origin: WO2011018404A1] The invention relates to a power plant (1) and a method for operating a power plant, wherein the turbine (2) disposed in the power plant (1) is to be switched off as quickly as possible for repair or maintenance purposes, the generator (5) being decoupled from the electrical grid for this purpose and being connected to an electrical consumer designed as an immersion heater by means of a switch (11), and the immersion heater being used for heating water, whereby the shutdown time of the turbine (2) can be further shortened.
