Abstract (en)
[origin: WO2011018158A1] The invention relates to a device allowing the removal of radiographic films (14) radiated by x-ray light from an opaque protective sheath (10). The invention comprises means for holding down a wall segment of the protective sheath (10), and means (70, 120) for moving the radiographic film (14) with respect to the held down wall segments of the protective sheath (10).
