Abstract (en)

[origin: WO2011018759A1] At least one region of interest within an image is determined, step 201. The image is resized to a target image size step 207. If at least one region of interest is determined the image is cropped to each of the at least one region of interest, step 205 and the cropped at least one region of interest is resized to the target image size. The resized image and the resized cropped at least one region of interest are stored for display, step 209.
