Abstract (en)

[origin: WO2011018399A1] The present invention relates to a method for producing an energy storage device (200) for at least one electrochemical energy storage unit (210). The method comprises a step of providing (110) the at least one electrochemical energy storage unit (210) suitable for providing energy for a drive of a vehicle, and a step of at least partially insert molding (120) the at least one electrochemical energy storage unit (210) in a casting compound in order to produce the energy storage device (200), wherein the at least one electrochemical energy storage unit (210) is positively or adhesively connected to the casting compound in the insert molding step.
