Abstract (en)
[origin: WO2011018361A1] The present invention relates to a panel having electrically conductive structures, comprising a panel (1) having at least two electrically conductive structures (2a, 2b) galvanically separated from each other, a galvanic separating layer (5) at least on one of the electrically conductive structures (2a, 2b), and an electrical conductor (4) on the galvanic separating layer (5), wherein the galvanic separating layer (5) galvanically separates the electrical conductor (4) from at least one of the electrically conductive structures (2a, 2b). The invention further relates to a method for producing and to a novel use of the panel.
