Abstract (en)

[origin: EP2465363A2] The bobbin rolling device has a bobbin support (6) for supporting a bobbin (8) on which a cigarette paper web (14) is wound on. The guide units (16,20) are provided for guiding the paper web from bobbin to an interface (42a) along a transport path. The interface is connected to downstream of a cigarette production machine, for transferring the guided paper web to the production machine. A printing unit (32) is provided for printing paper web.
