Abstract (en)

[origin: EP2465368A2] The clothing i.e. reflective vest (1), has blank parts jointed to form clothing by a material engagement connection i.e. welding. The clothing is formed from a single layered textile web or plastic film material. A thickness of the web or material is measured small so that the clothing is foldable in a package volume ranging from 20 cubic cm to 50 cubic cm. A light reflecting pattern is attached as light reflecting strips (2) on the clothing. The web or material includes a melting temperature of larger than 60 degree Celsius. The blank parts are provided with an arrangement of impressions. Independent claims are also included for the following: (1) a method for manufacturing a warning clothing for a user of a motor vehicle (2) a package arrangement including packages.
