Abstract (en)

[origin: EP2077084A2] The panel carriage (4) has a hanging device (2) for placing a curtain guide rail (3) in a retainer (3a). The hanging device is formed such that the panel carriage is displaced into usage position. The retaining device and panel carriage are coupled directly or indirectly by a handlebar. The handlebar is arranged so that the panel carriage is transferred from the usage position into an assembly position for placing a curtain element (1) at the panel carriage. An independent claim is included for a system for hanging of flat curtain.
