Abstract (en)

[origin: EP2465673A2] The device (10) has a press device (12) i.e. ball press, provided for holding and pressing packed and/or unpacked mineral wool bundles (34). A suction device (16) is arranged regarding the press device such that dirt and/or mineral fibers that are occurred during the pressing are sucked by the suction device. The dirt and/or mineral fibers are supplied to a filter device (20) that is connected with the suction device or integrated in the suction device. The suction device has a suction hood (14) i.e. spinning hood, which is connected with the filter device via a suction line (18).
