Abstract (en)

[origin: EP2465695A1] A rounded back (2) of book block (1) is clamped between two clamping jaws (41) that are arranged parallel to longitudinal axis (3) of book block. A pressing structure (6) is aligned parallel to longitudinal axis of book block and is movable perpendicular to longitudinal axis of book block so as to press the middle of the rounded back of book block. An independent claim is included for device for pressing book block.
