Abstract (en)

[origin: EP2465984A2] Provided are a knitting method of a knitted fabric of knitting a knitted fabric formed with a pattern based on an apparent difference between a first knitting yarn and a second knitting yarn using a flat knitting machine, and a knitted fabric including a portion knitted by applying the method. The pattern based on the apparent difference between the first knitting yarn and the second knitting yarn is formed in the knitted fabric by repeating the following steps A to C: the step A of knitting a base stitch row (10) using a first knitting yarn; the step B of selecting a single or plural target stitch(es) (1) of the base stitch row (10) knitted in the step A, and forming a split stitch (2) using a second knitting yarn, which is a different type from the first knitting yarn, with respect to each selected target stitch (1); and the step C of overlapping the target stitch (1) selected in the step B and the split stitch (2) formed with respect to the target stitch (1).
