Abstract (en)

[origin: EP2465997A2] The appliance e.g. washing machine (1), has a housing (4), and a drum (3) for retaining of laundry articles. A caustic solution container (2) surrounds the drum in sections. The caustic solution container is fixedly connected with the housing in a movable manner. A caustic solution pump (5), a rinsing shell (7) and a sensor (10) i.e. pressure sensor, are fixedly connected with the caustic solution container in a movable manner. The rinsing shell is integrally formed with the caustic solution container. The rinsing shell serves as a component of a water filler system.
