Abstract (en)

[origin: EP2466006A2] The transferring apparatus has a pivot bar (42) pivotally mounted on a horizontal axis of rotation (44). The pivot bar is sectionally aligned with a horizontal rail portion (38) in a position, and with an inclined rail portion (32) in another position. A pivoting device (46) is coupled to the pivot bar, by which the pivot bar is pivotable between the two positions. An independent claim is also included for a conveyor system for transporting objects.
