Abstract (en)  
[origin: EP2466211A1] The cooking appliance (1) has a cooking chamber (2) that is heated by a heat source. A door (4) is provided to close the cooking chamber. An opening unit is provided to open the door automatically based on control signal from a control unit. A blower is arranged in the housing (24) to direct fresh air into cooking chamber. An independent claim is included for method of operating cooking appliance.
