Abstract (en)
[origin: EP2466551A2] The on-board information system (1) comprises a housing (2) arranged with a computing unit and one memory unit. The housing has a movable support (17) provided with a data interface for another memory unit that transfers data to the computing unit. The movable support is provided with a retainer that is formed with an aperture (19) for receiving another memory unit. An independent claim is included for method for extending storage capacity of on-board information system.
