Abstract (en)

[origin: EP2466572A2] The light-emitting element (1) has a luminous element housing (2) having a light output opening (4). Two light sources (6,8) are provided for generating two different lights (L1,L2) respectively. The reflection surfaces (10,12) are provided to reflect two different lights respectively. The reflection surface (10) is arranged between the light output opening and light source (8) and is used as diaphragm. An independent claim is included for light assembly.
