Abstract (en)

[origin: WO2011020725A1] The invention relates to a method for producing a floor for a heat exchanger, having the following steps: a. feeding a strand (3) of material to a tool (1); b. at least partially introducing a passage (4) of the floor into the strand (3) of material by means of at least one die (1a-1e) of the tool (1); c. advancing the strand of material (3) along a specified path in a longitudinal direction (L); d. repeating steps b. and c. until a specified number of passages (4) are introduced into the floor.
