Abstract (en)
[origin: WO2012041594A1] The invention relates to a printing blanket unit (1) for a printing blanket cylinder of a rotary printing press having a printing blanket (4) with two parallel side edges which extend in a transverse direction of the printing blanket (4), lie opposite one another, and of which one forms a leading side edge (8) and one forms a trailing side edge (10) with regard to a rotation of the printing blanket cylinder, characterized by an upper side (12) of the printing blanket (4), which upper side (12) has at least one groove (6) which runs in a longitudinal direction of the printing blanket (4), which longitudinal direction runs perpendicularly with respect to the transverse direction.
