Abstract (en)

[origin: WO2011020677A2] The invention relates to a refrigeration device, in particular a NoFrost refrigeration device, comprising a defrosting water channel (2) which is closed by channel closure means (1). Said channel closure means are not or only partially water-soluble and are secured to or into the defrosting water channel (2) by means of water-soluble securing means, preferably, a water-soluble adhesive.
