Abstract (en)

[origin: WO2011020809A2] The invention relates to a decorative element (30) for a refrigeration device, in particular for a household refrigeration device. Said decorative element (30) comprises at least one decorative surface which is embodied on a support material. Said decorative surface is at least partially covered with a decorative film which is bonded to the support material. The invention also relates to set of said type of decorative elements (30) and to a method for producing said type of decorative elements (30). The invention further relates to a refrigeration device comprising at least one decorative element (30) of said type.
