Abstract (en)
Construction element for making a shower, which construction element (1) mainly has the characteristics of a dish or a shallow tub or the like and to that end comprises a bottom (2) and a discharge opening (15) and, in the periphery of the construction element (1), an overflow brim which predominantly defines a reference plane (A), characterised in that the overflow brim mainly joins the bottom (2) at least partly or whereby the overflow brim is at least partly formed by the bottom (2) which to that end slants at least partly in relation to the reference plane (A) formed by the overflow brim.
