Abstract (en)
A housing (7) has sole clamp (16) having edge region inserted into assembly ski boot sole. A spring assembly (22) biases clamp in clamping position to allow release of ski boot sole in sideways direction against release resistance. The overlapping surfaces are stretched in transverse direction of sole clamp in upper side of sole edge and are engaged over from above to respective ski boot sole vertically to lock on ski top face. The overlapping surfaces are inclinedly raised towards ski waist in transverse direction and forms sloped surface (19') that upwardly inclined on free end of clamp.

Abstract (de)
Die Erfindung bezieht sich auf ein Schuh halteraggregat einer Skibindung mit Auslösbarkeit in Seitwärtsrichtung sowie Vertikalrichtung. Dabei zeichnet das Schuhhalteraggregat durch geringen Raumbedarf und einfache Konstruktion aus.
