Abstract (en)

[origin: EP2468461A2] The auxiliary handle (10) has two coupling parts (21,22), which are interlocked along a lock coupling axis in axial manner. A lock coupling (20) is arranged between the coupling parts under formation of a bayonet lock. The bayonet lock is formed by a movable engaging element in a guide. An independent claim is also included for a hand machine tool, which has a main handle.
