Abstract (en)  
The present invention relates to a lateral junction assembly (1) for insertion into a casing having an inner surface and defining a longitudinal axis (52), the lateral junction assembly having a longitudinal direction (50) which is substantially parallel to the longitudinal axis and comprising a pipe module (10) comprising a pipe section (12) and a flange (11). Furthermore, the invention relates to a lateral junction system for providing a lateral junction in a wellbore, the lateral junction system comprising a primary casing (60) having an inner surface (62) and at least one opening (61). Moreover, the invention relates to a wireline tool (80) for transporting, positioning and assembling a lateral junction assembly in a casing. Finally, the present invention relates to a method of installing a lateral junction assembly in a wellbore.
