Abstract (en)
[origin: EP2469162A2] The holder (2) has a holding element fixed at a wall (6), and another holding element (10) connected with a lamp (4) in a position-fixed manner. The latter holding element is pivotably arranged opposite to the former holding element around a pivoting axle (S). The latter holding element comprises a support unit, which holds the lamp at top part of the holder. The support unit comprises a locking element (142). The former holding element comprises a disk-shaped part and a distance holder, and the latter holding element comprises a through hole (102).
