Abstract (en)

[origin: WO2011025321A1] The patent application discloses a control method of a laundry machine provided with a balancer. The method includes a balancing step of at least one time for rotating a drum (30) at a constant speed for a predetermined time by decelerating the drum (30) if the drum (30) is accelerated at a predetermined RPM or more. The balancing step is performed after a rotation speed of the drum (30) passes through a transient region of the laundry machine (100).
