Abstract (en)
[origin: WO2011023621A1] The present invention relates to a supply chute for supplying sinter material onto a sinter cooler, and to a method for supplying sinter material from a sinter belt onto a sinter cooler. Sinter material introduced into the supply chute here is divided up, by distributing plates (7a, 7b), into partial sinter-material streams which flow in different directions and are directed into the peripheral regions of an overall sinter-material stream, which is produced by the partial streams being combined.
