Abstract (en)
[origin: WO2011028589A2] A telepresence system that includes a portable telepresence apparatus coupled to a remote control station. The telepresence apparatus comprises a monitor, a camera, a speaker, a microphone and a viewfinder screen coupled to a housing. The view finder screen allows the user to view the image being captured by the camera. The portable telepresence apparatus is a hand held device that can be moved by a holder of the device in response to audio commands from the remote station. The telepresence apparatus can be used by medical personnel to remotely view a patient in a fast and efficient manner.
