Abstract (en)

[origin: WO2011023347A1] Assembly for making an electrical connection, in particular electrical contact, between a multiwire coaxial cable and a printed circuit board, circuit assembly and electrical device, wherein a wire of the coaxial cable to be connected in each case is exposed in the axial end regions, in particular in different axial end regions, wherein the exposed regions are connected by clamping by means of terminal blocks, in order to produce an electrical connection, in particular to a metal foil and/or the terminal block.
