Abstract (en)

[origin: CN102525090A] The invention relates to an applicator device, an applicator with the same, and an application unit. The applicator device is provided with a core (2) from which application organs (6) extend. The applicator device (1) can be produced using a primary forming process in which, at least in some portions, the application organs (5) are disposed in a longitudinal extent in rows (R1,R2,R3), as viewed along a longitudinal axis (L) of the core (2), and comprise a central axis (M). The central axis (M) of the application organs (5) have at least one undulation with at least one change of curvature, and the central axis (M) of an application organ (5) lies completely or substantially completely within one plane (E) or spanning a plane (E).
