Abstract (en)

[origin: EP2471724A1] The plastic bag comprises side folds (3,3') formed between front wall (1) and rear wall (2), and reseal strips (4) of reseal element (5) which are arranged in inner surface of side fold (3) and adjoined with inner surfaces of front and rear walls. The reseal strips, front wall and rear wall form a two-layer bag portion (A). The front wall, rear wall and side fold form a four-layer bag portion (B) which is detachably connected using reseal strip. The portions of the reseal strips on front and rear walls in the region of two-layer bag portion are not connected.
