Abstract (en)

[origin: EP2472101A1] The electric machine (10) has a toothed ring (25), where a turning pinion (22) is positioned. The turning pinion is driven over a freewheel (137), where the turning pinion and a roller collar of the freewheel are executed as separate components. The turning pinion and roller collar are movable relative to each other, and are arranged concentric to each other.
